EDUCATION

Bapuji Institute of Engineering & Technology (BIET), Davangere <i>B.E. Information Science Engineering</i>	Aug 2025 – Jul 2028 CGPA: 7.6 / 10.0
JSS KH Kabbur Institute of Engineering, Dharwad <i>Diploma – Electronics & Communications Engineering</i>	Aug 2022 – Apr 2025

EXPERIENCE

ZeTheta Algorithms Pvt. Ltd. <i>DevOps Engineer Intern</i>	Aug 2026 – Present Mumbai (Remote)
- Architect and deploy security-hardened AWS cloud infrastructure for BFSI clients, applying compliance-aligned configurations for high-stakes financial systems. - Implement CI/CD pipelines and infrastructure-as-code (IaC) to automate deployments, reducing manual intervention and accelerating release cycles. - Collaborate in an agile team to design scalable, fault-tolerant distributed systems meeting enterprise reliability standards.	
Athreya Technologies Pvt. Ltd. <i>Internet Of Things Intern</i>	Dec 2024 – Mar 2025 Hubballi (on-site)
- Developed and optimized software modules in C, C++, Python, and Java within an agile environment, contributing to production-grade codebases. - Participated in structured code reviews to enforce coding standards; utilized Git for collaborative version-controlled development across team branches. - Integrated IoT hardware components with software layers to enable real-time embedded data communication.	

PROJECTS

IoT Camera Security System <i>Python, Arduino, IoT Sensors</i>	2024
Engineered a smart surveillance system using IoT motion sensors and computer vision; automated real-time alerts delivered to a mobile UI, reducing manual monitoring overhead.	
NovaPay Digital Bank – Zero-Downtime CI/CD Pipeline <i>GitHub Actions, Docker, SonarQube, OPA, Kubernetes</i>	2026
- Architected a production-grade 8-stage CI/CD pipeline for a fictional RBI-licensed bank, cutting commit-to-production time from a fortnightly manual cycle to under 2 hours. - Implemented blue-green and canary deployment strategies with automated rollback triggers on Kubernetes, targeting 99.999% availability	
MealMart – Smart Tiffin Subscription System <i>React.js, Supabase, Vercel</i>	2025
- Built a full-stack meal subscription platform with real-time order management, user authentication, and dynamic menu control using React hooks and Supabase Realtime APIs. - Deployed on Vercel with a cloud PostgreSQL backend; implemented role-based access for admin and subscriber flows.	
SpendWise – Expense Tracker <i>MongoDB Atlas, Express.js, React.js, Node.js, JWT, Recharts</i>	2025
- Designed a MERN-stack finance app with JWT authentication, expense categorization, and interactive Recharts dashboards for spending analysis. - Leveraged MongoDB Atlas for scalable cloud persistence; zero-cost production deployment on Render (API) and Vercel.	

TECHNICAL SKILLS

Languages: Java, Python, C, C++, SQL
CS Fundamentals: Data Structures & Algorithms, Object-Oriented Programming, Full Stack, System Design, Machine Learning
Cloud & DevOps: AWS (Lambda, DynamoDB, API Gateway), CI/CD Pipelines, Infrastructure-as-Code
Databases: MongoDB Atlas, Supabase (PostgreSQL)
Others: Prompt Engineering, Git, GitHub, VS Code, Vercel, Claude, Arduino, PCB Design, Digital Electronics, AutoCAD, Operating System OpenAI, Project management skill

CERTIFICATIONS

IIT Delhi: Artificial Intelligence
NVIDIA: Getting Started with AI on Jetson Nano
Anthropic: Claude Code in Action · Claude Code 101
MongoDB University: Relational Model (SQL) to MongoDB
NxtWave: AI for Students: Build Your Own Generative AI Model · ML Model Deployment using Flask

LANGUAGES

English (Professional) · Hindi (Fluent) · Kannada (Fluent) · Italian (Beginner)
